

GRADER

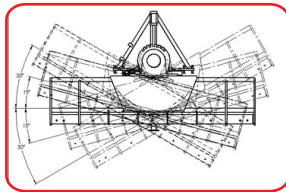

HMG 210 HMG 270

HMG is a heavy-duty rear mounted grader, designed with multiple features such as vertical tilt for ditching; multiset locking 15°- 30- 45° L/R, and off-set positioning on both sides of the tractor. HMG can swivel 360° and can as such also be set for reverse levelling.

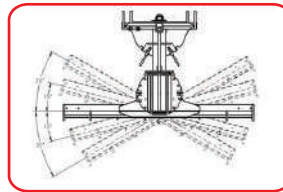

Due to design restrictions, however, this should be done in loose material only, as otherwise breakages may occur. Swivel bolt wrench supplied F-O-C with each machine. HMG is equally useful for private owners, estates as well as for contractors - for such tasks as road maintenance, slurry scraping, landscaping and ditching.
